Requirements

1. Project Overview

We are looking to develop a premium, modern, and visually attractive website for VELQON that reflects our brand identity and showcases our projects and services.

The website should provide a unique browsing experience with high-quality images, smooth animations, and an interactive homepage.

One of our main requirements is a cinematic scrolling experience where visitors can explore different interior spaces through a room-by-room visual walkthrough.

We also require a simple admin panel to manage website content, projects, services, images, and customer enquiries independently.

2. Website Structure & Design

The website should include the following pages:

1. Home
2. About Us
3. Services
4. Projects / Portfolio
5. Contact Us

Design Preferences:

- Charcoal black and white colour combination.
- Minimal, modern, and premium appearance.
- Elegant typography and clean layouts.
- High-quality images and visual presentations.
- Smooth scrolling and attractive animations.
- Simple navigation.
- Fully responsive across desktop, tablet, and mobile.

3. Website Functional Requirements

Home Page

- Premium full-screen introduction.
- Interactive scroll-based visual walkthrough.
- Room-by-room image transitions.

- Featured projects and services.
- Company introduction.
- Smooth animations and contact options.

About Us

- Company introduction and background.
- Vision, mission, and design philosophy.
- Team information and supporting images.

Services

- Display all company services.
- Individual service descriptions and images.
- Enquiry option for each service.

Projects / Portfolio

- Project listing with multiple categories.
- Category-based project filtering.
- Individual project detail pages.
- Multiple images and galleries.
- Project descriptions and featured projects.

Contact Us

- Company address, email, and phone.
- WhatsApp contact option.
- Google Maps integration.
- Contact enquiry form.

4. Admin Panel & Content Management

We require an easy-to-use admin panel to:

- Add, edit, and update website content.
- Upload and replace images.
- Add, edit, and delete projects.
- Manage project categories and galleries.
- Add, edit, and remove services.
- Update contact details and social media links.
- View and manage customer enquiries.
- Update website page titles and descriptions.

5. Enquiry Form & WhatsApp Integration

The enquiry form should include:

- Full Name
- Email Address
- Contact Number
- Project Type
- Location
- Project Requirements / Message

After submission:

- Enquiry details should be sent to our official email.
- WhatsApp notifications should be triggered.
- Enquiries should be automatically saved in the admin panel.
- Administrators should be able to view all submitted enquiries.

WhatsApp integration will depend on the availability of the required WhatsApp Business account and access.

6. Google Search & Visibility

We require basic SEO setup, including:

- Google-friendly website links.
- Page titles and descriptions.
- Image descriptions.
- Sitemap creation.
- Image optimization.
- Google Search Console setup assistance.

7. Performance & Security

- Fast-loading website pages.
- Optimized images and smooth animations.
- Mobile-friendly design.
- Compatibility with major browsers.
- SSL certificate.
- Secure admin login.
- Protection against unauthorized access.
- Secure enquiry storage and regular backups.

8. Hosting & Deployment

We prefer hosting the website on a Dubai-based server.

The development team should handle:

- Hosting setup and server configuration.
- Domain connection and SSL installation.
- Website and database deployment.
- Email notification setup.
- Initial website monitoring.

Initially, the development team will manage hosting and basic operations. After an agreed period of a few months, we require complete website access, hosting credentials, admin access, and basic usage documentation to manage everything independently.

Expected Outcome

We expect a premium, visually immersive, fully responsive website with a cinematic homepage, dynamic project portfolio, easy-to-manage admin panel, enquiry management, WhatsApp integration, and Dubai-based hosting.

Document: Initial Website Development Requirements
Status: Subject to further discussion and finalization.
